To Whom It May Concern

This is to certify that Mintesnot Gebre has been a student of Mechanical Engineering at Bahir Dar University through a scholarship granted by Compassion International Ethiopia Leadership Development Program.

In addition to his regular academic program, he took various courses in holistic development and servant leadership during his stay in our Leadership Development Program. The student has graduated from the Leadership Development Program in July 2017.

I strongly believe that the various trainings, which he took, and the service opportunities he participated in, have equipped him to become a servant leader in whichever capacity he will be entrusted with to serve his community and nation at large. Therefore, I strongly recommend him to be offered a job opportunity in a position related to his academic qualification.

With regards,

Fikre Lobago (PhD)

Program Director
